Instructions

1) Print on both sides of paper and laminate or print on heavier paper. Center image before printing.
2) Cut along outlines of windmill shape.
3) Poke out holes for stars using a push-pin.
4) Fold up along grey dashed lines.
5) Tape together edges with clear tape.

Sun moves 1/12 way around ecliptic each month, while Moon circles ecliptic each Month. Visible planets move at different speeds based on own orbits and Earth's orbit. Entire ecliptic appears to spin once every day as Earth spins.
